

ANIMALS OF THE GALÁPAGOS MATCH UP

Match the picture of the animal/animals to the description. Get answers and learn the names of the animals at bottom. Read *Galápagos Girl* to learn more.

A. This bird hangs out in mangroves and gets its bright color from what it eats.

1.

B. This lizard munches seaweed and looks a bit like a dinosaur.

2.

C. When they court, these birds "dance" with their colorful feet.

3.

D. This large reptile can live over 100 years. It moves slowly. Maybe that's why it lives so long!

4.

E. Most species of this animal live in much colder climates, but this small species likes it near the equator.

5.

- A. matches #2 – Galápagos flamingos
- B. matches #1 - Galápagos marine iguana
- C. matches #5 – Blue-footed boobies
- D. matches #3 – Galápagos tortoise
- E. matches #4 – Galápagos penguins
